

AWS Cloud Computing & IAM

Hands-On Practical Submission

Name: S Damodararao Date: 14-08-2026

This document contains the AWS Free Tier practical exercise submission — the concept report followed by screenshot evidence for each completed task.

1. PDF Report

Attach or link the concept PDF report (Cloud Computing, Service Models, Deployment Models, AWS Global Infrastructure, IAM, IAM Users/Groups/Roles, IAM Policies, Shared Responsibility Model) here, or insert it as an embedded object below.

2. Screenshot: AWS Account Created

Task performed:

Created a new AWS Free Tier account using a personal email ID and selected the **Basic Support – Free** plan.

What this screenshot shows:

The AWS Management Console home page after successful sign-in, with my **name and AWS account ID highlighted in the top-right corner**, confirming that the AWS account was successfully created and accessed.

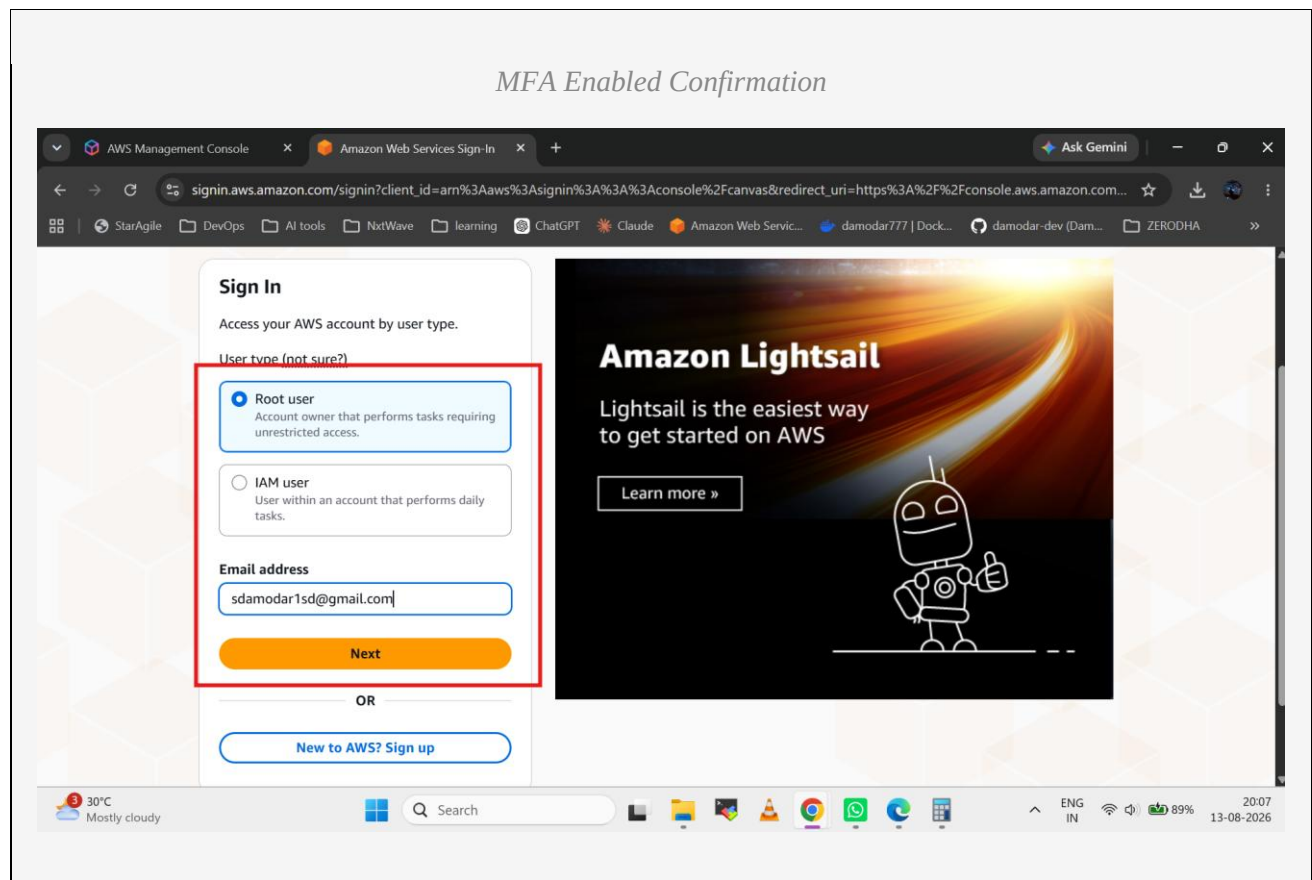

3. Screenshot: MFA Enabled

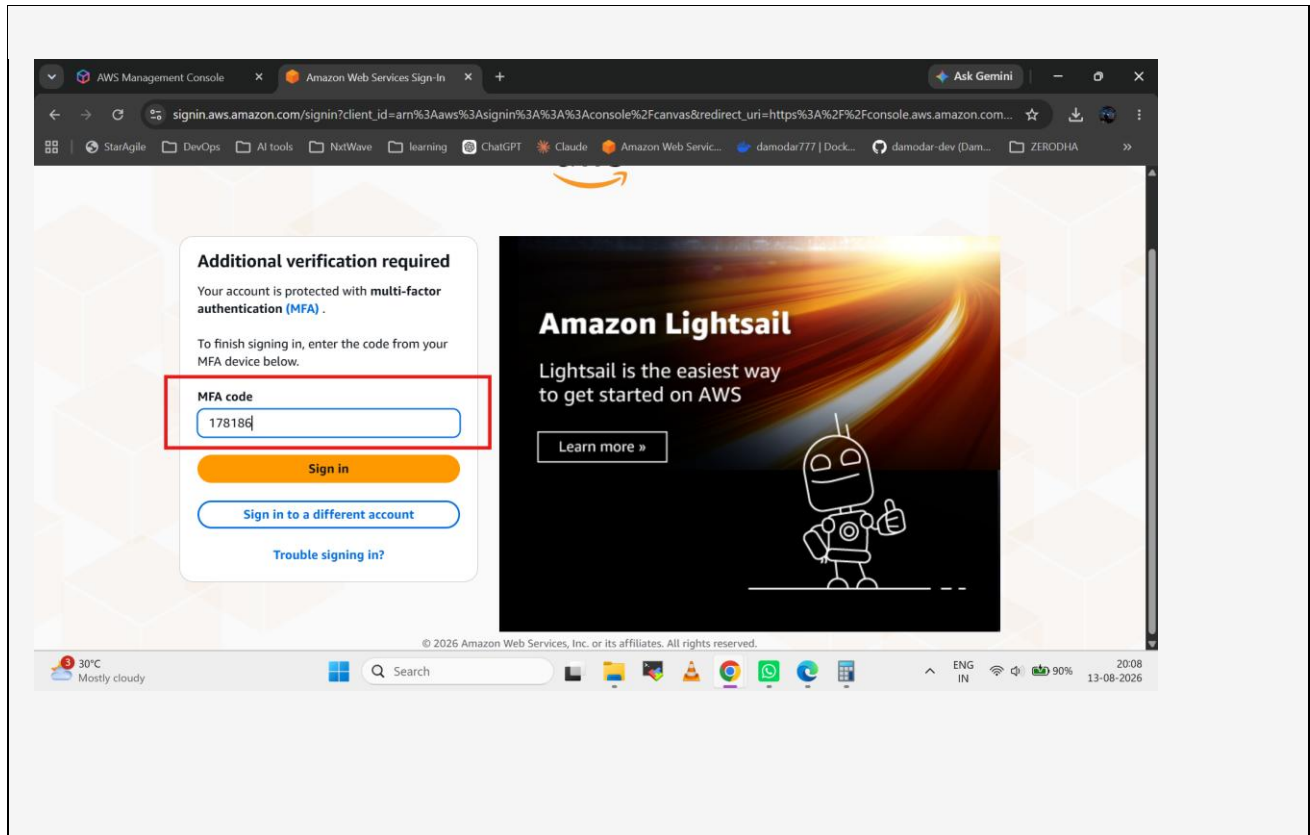

Task performed:

Enabled Multi-Factor Authentication (MFA) on the AWS root account using the Authy authenticator app to provide an additional layer of login security.

What this screenshot shows:

The AWS root account login page with MFA enabled, demonstrating that an MFA verification code is required during the root account login process.

4. Screenshot: IAM User & Group

Task performed:

Created an IAM Group and added the IAM user **user-1** to the group. Attached the **AmazonEC2FullAccess** and **AmazonS3FullAccess** policies to the group. The user **user-1** inherited the same permissions through group membership instead of having the policies assigned directly to the user.

What this screenshot shows:

The IAM Group with **user-1** as a member and the attached **AmazonEC2FullAccess** and **AmazonS3FullAccess** policies. The same policies are also visible for **user-1** through the group membership.

5. Screenshot: IAM Role

Task performed:

Created an IAM Role with **AmazonS3FullAccess** permission to allow secure access to S3 resources. The role is intended for storing and accessing application artifacts in an S3 bucket.

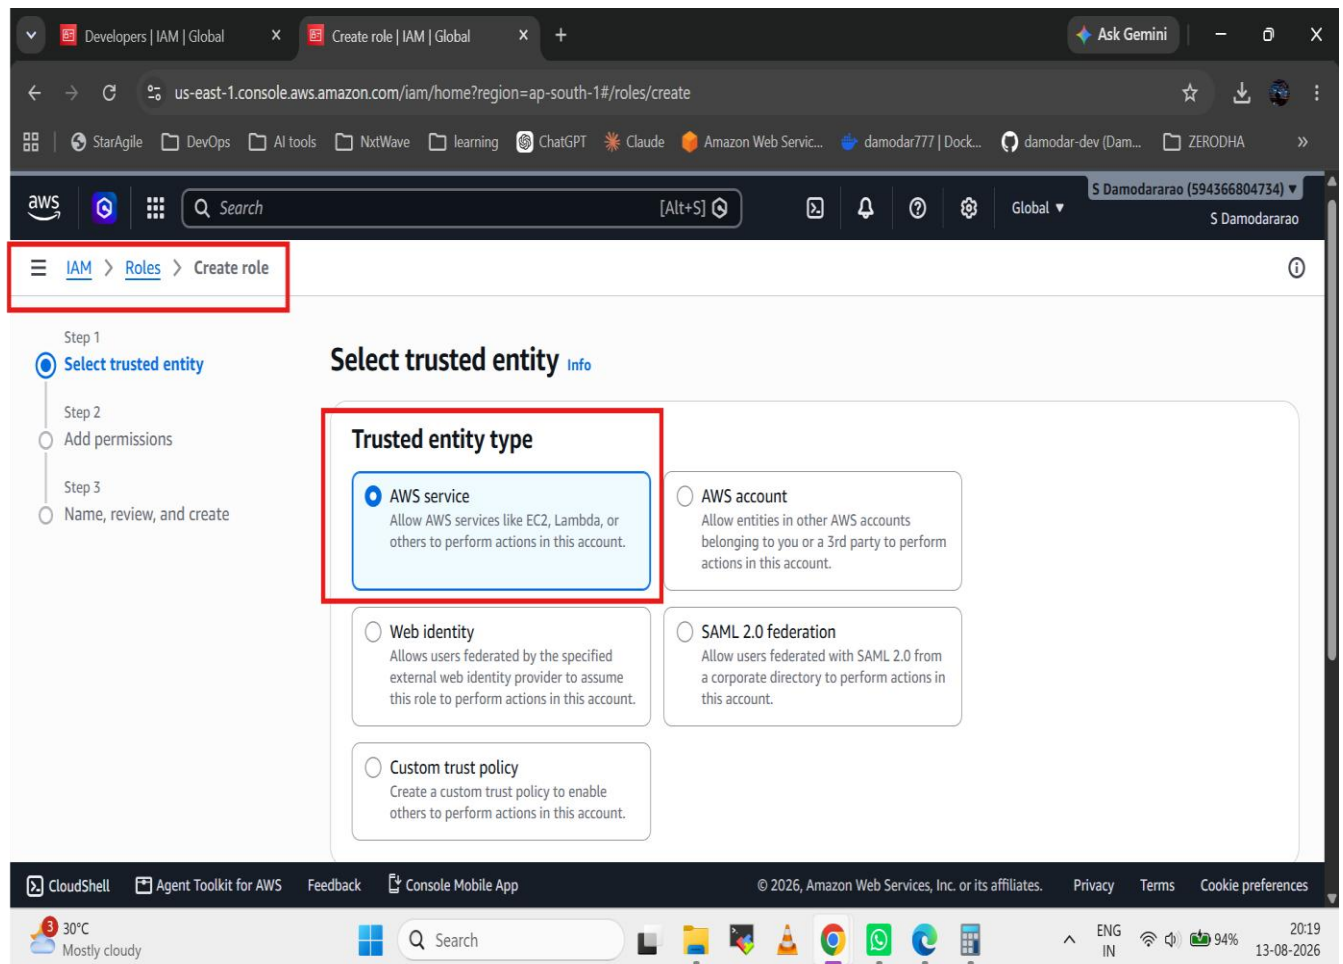

Role description:

Artifacts storage in S3 bucket.

What this screenshot shows:

The IAM > Roles page showing the created role with **AmazonS3FullAccess** policy attached, demonstrating that the role has permission to access and manage objects in the S3 bucket.

IAM Role For AWS Service

6. Screenshot: Billing Dashboard

Task performed:

Explored the AWS Billing and Cost Management dashboard, reviewed Free Tier usage tracking, and set up a budget alert to avoid unexpected charges.

What this screenshot should show:

The Billing Dashboard showing current month-to-date spend and/or the Free Tier usage alerts page.

Billing Dashboard Overview

The screenshot displays the AWS Billing and Cost Management dashboard. The left sidebar shows navigation options: Home, Getting Started, FinOps Agent, Billing and Payments (with 'Bills' selected), Cost and Usage Analysis, and Cost Explorer. The main content area is titled 'Amazon Web Services India Private Limited charges by service' and shows a table of charges. The table has columns for Description, Usage Quantity, and Amount in USD. The total pre-tax service charges in USD are shown as USD 0.00. The table lists several services, all with a charge of USD 0.00.

Description	Usage Quantity	Amount in USD
Data Transfer		USD 0.00
Elastic Compute Cloud		USD 0.00
Glue		USD 0.00
Key Management Service		USD 0.00
Secrets Manager		USD 0.00
